Match Rate: 67% (4 matched / 2 missing)

Matched (4):

python | react | aws | docker

Missing from JD (2):

kubernetes | terraform

Bullet Enhancements

Original vs. AI-enhanced resume bullets using Google's XYZ formula.

#1

Before: *worked on backend apis*

After: **Engineered RESTful backend APIs serving 10k+ daily requests.**

#2

Before: *helped with frontend*

After: **Spearheaded frontend development reducing page load time by 40%.**

"Accomplished [X] as measured by [Y], by doing [Z]"

- Begin every bullet with a high-impact action verb (Engineered, Spearheaded, Architected, Optimized).
- Quantify results wherever possible: use %, latency ms, $ amounts, user counts, or request volume.
- Keep bullets to 1-2 lines maximum -- hiring managers spend 6-8 seconds per resume.
- Mirror keywords and technologies directly from the job description in your skills and bullets.
- Add a 'Projects' section if missing -- it's the single highest-impact section for fresh graduates.
